

Приложение N 10.1
к постановлению Администрации
городского округа город Салават
Республики Башкортостан
от « » 2017 г. N

Устанавливаемая красная линия территории, предназначенная для размещения линейного объекта

The diagram shows two overlapping rectangular regions, labeled 1 and 2. A magenta line represents a function f defined over the union of these regions. The function is composed of two parts: f_1 on region 1 and f_2 on region 2. The function f_1 is a step function that is low on the left and slightly higher on the right. The function f_2 starts at a low value on the left, increases linearly to a high value on the right, and then has a small step down. The total function f is the sum of f_1 and f_2 .
